

LIBRARY AND KNOWLEDGE SERVICES IMPACT DATA DEC 2020 - MAR 2021

Feedback and impact data from literature searches, training sessions and article requests have been collected. Surveys were emailed to staff from all three NHS Trusts across Lincolnshire.

The information will be used to inform risk assessment training for the Trust

44% of respondents said that their literature search was used to **improve Trust services or patient care.**

Articles supplied by the Library Service were mostly used for **personal or professional development**

From the information I received I was able to put a 'project' in place to improve the service we provide to patients from a BAME background.

100% of respondents said that they **gained new knowledge** from their information skills training session

50% of respondents said that the articles they requested were used to **inform decision making.**

[The article] was discussed at the Urology MDT meeting to identify ideal candidates for PSMA scans
