<p>Postdeployment mental health concerns and family functioning in veteran men and women Zelkowitz R et al Psychological Trauma 15 (4) 705-714</p>
<p>Military veterans and civilians' mental health diagnoses: an analysis of secondary mental health services</p>

Healthcare provision in the United Kingdom (UK) falls primarily to the National Health Service (NHS) which is free at the point of access. In the UK, there is currently no national marker to identify military veterans in electronic health records, nor a requirement to record it. This study aimed to compare the sociodemographic characteristics and recorded mental health diagnoses of a sample of veterans and civilians accessing secondary mental health services.
