email: library.grantham@ulh.nhs.uk

If you require an in-depth search on a topic featured in this bulletin then please contact clinical.librarian@ulh.nhs.uk

Abuse/Violence/Bullying

Legal abuse and mental health: the role of judicial betrayal

When mothers who have survived intimate partner violence separate from their partners, they often turn to family court for help with a range of issues from division of assets to child custody arrangements. Often, however, they face ongoing legal abuse when abusive partners use court processes to further enact coercive control and judicial betrayal, when judges fail to prevent such harms and/or add to the mistreatment

Robot death and human grief in films: a qualitative study

As humans are increasingly brought into contact with more human-like machines, it is relevant to consider the nature of our relationship to these technologies. Centered on a qualitative analysis of 35 films, this study seeks to determine whether humans experience grief when a robot is destroyed, and if so, under what conditions.
