

Paediatric Bulletin

How to obtain an article

If you would like to request any of the latest articles included in this bulletin, or to be put onto the bulletin's distribution list, please contact:
library.pilgrim@ulh.nhs.uk

Articles

[Perinatal communication in extreme preterm birth: what can we learn from the British Association of Perinatal Medicine framework](#)

This article explores the rationale behind the updated framework, summarizes recent developments in individualized clinical risk assessment and explores the provision of good quality palliative care where this is appropriate.

Paediatrics and Child Health, 2023-03-01, Volume 33, Issue 3, pp. 73-77

[Differential diagnosis of child physical abuse: conditions that may be mistaken for child abuse](#)

In this article we discuss the differential diagnosis of bruising, fractures and head injuries which are the three commonest presenting features of physical abuse. Awareness of the differential diagnosis and appropriate assessment of the injured child can assist in reaching the correct diagnosis and therefore protect children from harm.

Paediatrics and Child Health, 2023-03-01, Volume 33, Issue 3, pp.78-83

[Think hyperammonaemia: the importance of early clinical management in urea cycle disorders](#)

This review highlights the importance of early recognition of UCDs and the initiation of clinical management.

Paediatrics and Child Health, 2023-03-01, Volume 33, Issue 3, pp. 57-64

[Approach to a child or young person with concerns about excess weight](#)

This article offers an approach to recognising and discussing excess weight in a child or young person, drawing on formal guidance from the UK (the NHS, the National Institute of Health and Care Excellence (NICE), and the Royal College of Paediatrics and Child Health).

BMJ, 380 February 16th 2023

[Nasogastric tube feeding under restraint: practical guidance for children's nurses](#)

This article offers an overview of eating disorders and their detrimental effects as well as practical advice for children's nurses,

Nursing Children and Young People Vol. 35 Issue 2, pp. 18–23, 2023.

[Indwelling urinary catheter insertion 1: children and young people](#)

Catheter insertion is an essential skill for nurses. This practical procedure, the first in a series of two articles about catheterisation, explains the step-by-step process of inserting an indwelling urinary catheter in a child or young person. This includes practical and ethical considerations, contraindications, catheter selection and infection prevention.

Nursing Times; 119: 3. 2023

[Paediatric blood sampling: how to improve your chances of getting it right](#)

This short article discusses the methods, approaches and techniques used for successful blood taking in children. This will include an overview of preparation, particular challenges and opportunities to aid difficulties.

Paediatrics and Child Health, 2023

Guidance

[UK screening and treatment of retinopathy of prematurity Updated 2022 Guidelines](#)

All the recommendations from both guidelines are included in this summary and the full Guidelines should be consulted for the evidence base behind the recommendations.

Early Human Development 177-178 (2023) 105715
